To Whom It May Concerns:

I want to have my solar system installed as soon as possible, but I can not get a reserved status on my residential application which was received by APS on July 23, 2010. Arizona Solar Pros is my installer and they are ready to do the work, but I am afraid to OK their continued work because APS tells me that if it is installed six months before my application is reserved my rebate may be affected. I have already made two payments to Arizona Solar Pros and now I am in a holding position.

I appreciate any help you can give.

Thanks,

George W Moser
